

Hunter Thompson

Solutions Engineer | APIs, SaaS Automation & AI Workflows

Brunswick, Georgia (Remote) · (571) 356-7996 · Huntertho56@gmail.com · linkedin.com/in/hunterthompson0831

SUMMARY

Solutions Engineer who builds the connective tissue between business systems: APIs, data pipelines, CRM/ERP-style automations, and AI-assisted workflows that replace manual processes with ones that run on their own. Experienced translating cross-functional business requirements into working technical solutions end-to-end — design, build, test, document, rollout. Comfortable with Python, SQL, and PowerShell; hands-on experience prototyping agentic AI workflows with Claude; background in serverless cloud automation (AWS Lambda, S3, API Gateway).

CORE SKILLS

- Integration & Automation: REST APIs, SFTP data workflows, data mapping, workflow automation, requirements-to-build translation
- Scripting & Data: Python, SQL, PowerShell
- Cloud: AWS Lambda, Amazon S3, API Gateway, serverless architecture
- AI & Automation: Agentic workflow prototyping with Claude (task routing, decision-based automation), AI-assistant deployment, knowledge-base design for AI accuracy
- Business Analysis: Cross-functional requirements gathering, stakeholder alignment, technical documentation, testing and QA

EXPERIENCE

Applications Integration Specialist *Dec 2024 – Present*

College of Coastal Georgia Brunswick, GA

- Design and build API- and SFTP-based data workflows connecting CRM, SIS, and campus-commerce platforms, translating cross-departmental business requirements into working technical logic.
- Own and maintain an AI-powered chat assistant used by students, applicants, and staff; build and refine its knowledge base for accuracy, configure handoff logic to live staff, and diagnose and fix issues including incorrect responses and failed escalations.
- Led a cross-functional rebuild of a manual, static tracking process into a dynamic, condition-based system spanning eight departments, aligning stakeholders with different technical fluency around a shared data model. Early results include an estimated 18% increase in one downstream engagement metric and 22% in another.
- Configure workflow automation, request forms, and approval routing to improve intake and operational visibility.
- Own technical delivery end-to-end: requirements gathering, workflow design, configuration, testing, and documentation.

Freelance Systems & Automation Consultant *Jun 2024 – Present*

Self-employed Remote

- Design and build workflow automation and web platforms for small-business clients, replacing manual intake, tracking, and operational processes with cloud-based systems.
- Prototype agentic workflows using Claude for task routing and decision-based automation, testing where an automated process holds up in real use versus where it needs a human in the loop.
- Build serverless automation using AWS Lambda, S3, and API Gateway to replace manual backend processing with real-time data flows.
- Gather requirements directly from business owners and translate ambiguous operational problems into scoped, working technical systems.

Business Operations Intern *Nov 2022 – Apr 2023*

Karate's Plumbing Inc. Jesup, GA

- Integrated service-request forms with backend workflows to streamline intake and processing; supported budgeting and process-improvement efforts.

SELECTED PROJECTS

Post-Admit Checklist Modernization (2025)

- Replaced a static, manual tracking process with a dynamic, condition-based workflow tied to live application data, coordinating logic across eight departments (Admissions, Housing, Registrar, Financial Aid, Bursar, Advising, Health Center, Academic Support).

Service Workflow Automation System, AWS (2024)

- Built a serverless workflow system (S3, Lambda, API Gateway) automating customer intake and backend processing, replacing manual request handling with real-time automated data flows.

EDUCATION

Georgia Institute of Technology — M.S., Computer Science (In Progress)

University of Georgia — M.B.T., Management Information Systems (2025)

College of Coastal Georgia — B.B.A., General Business (2023)
