

Hunter Thompson

Technical Solutions Engineer

SaaS & Enterprise Integrations • CRM/SIS Automation • APIs • AI Workflows
Brunswick, Georgia 31523 • (571) 356-7996 • Huntertho56@gmail.com

SUMMARY

Technical Solutions Engineer with hands-on experience designing SaaS integrations, CRM/SIS automations, API/SFTP data workflows, and AI-powered support systems across higher education and small-business environments. Experienced translating business requirements into scalable workflows across CRM, SIS, campus commerce, payment processing, forms/workflow, reporting, ITSM, and cloud platforms. Known for reducing manual processes, improving system visibility, and bridging business teams with technical platforms.

TECHNICAL SKILLS

Integration & Automation: SaaS integrations, CRM automation, SIS integrations, REST APIs, SFTP workflows, data pipelines, workflow automation, data mapping

Campus Commerce: TouchNet Marketplace, eCommerce storefronts, secure payment pages

Scripting & Data: PowerShell, SQL, requirements gathering, technical documentation, troubleshooting

AI & Support Automation: AI-powered assistants, knowledge-base-supported automation, student-service automation

Platforms: Element451, Ellucian Banner, Ellucian Ethos, TouchNet Marketplace / Campus Commerce, Dynamic Forms, Argos, ManageEngine, AWS Lambda, Amazon S3, API Gateway, Azure DevOps

PROFESSIONAL EXPERIENCE

College of Coastal Georgia | Brunswick, GA

December 2024 – Present

Applications Integration Specialist

- Design and implement integrations and automations across higher-ed CRM, SIS, campus commerce, forms/workflow, reporting, and ITSM platforms, including Element451, Ellucian Banner/Ethos, TouchNet Marketplace, Dynamic Forms, Argos, and ManageEngine.
- Develop and configure TouchNet Marketplace pages, storefront logic, and secure payment-page workflows to support campus eCommerce and departmental payment collection processes.
- Build and maintain automated data workflows using APIs, PowerShell, and SFTP to support secure system-to-system data exchange and reduce manual data handling.
- Automate admissions, onboarding, checklist, orientation, and student-service workflows by translating business requirements into scalable CRM/SIS logic.
- Own technical enhancement delivery through requirements gathering, workflow design, form creation, configuration, testing, documentation, and stakeholder rollout.
- Configure ManageEngine workflows, request forms, approval routing, and process automations to improve request intake and operational visibility.
- Build and deploy AI-powered assistants using Zia Bot and Element451 AI to support student interactions across phone, SMS, email, and chat.
- Document integration logic, data standards, and troubleshooting procedures across CRM/SIS and ITSM platforms to improve consistency, maintainability, and operational continuity.

Freelance Systems & Automation Consultant | Brunswick, GA

June 2024 – Present

- Design and deliver workflow automation systems for small businesses, replacing manual intake, tracking, and operational processes with cloud-based tools.
- Build production websites connected to backend workflows, customer intake forms, and operational routing logic.
- Develop serverless workflow solutions using AWS S3, Lambda, and API Gateway to automate request handling and backend processing.
- Gather business requirements, define technical workflows, and translate operational problems into scalable automation solutions.
- Prototype AI-assisted and agentic workflows using Claude and related tools to support task routing, data processing, and decision-based automation.

- Integrated service request forms with backend workflows to streamline intake and processing.
- Supported budgeting and process-improvement efforts across day-to-day operations.

SELECTED PROJECTS

Service Workflow Automation System (AWS)

June 2024 – August 2024

- Designed and built a serverless workflow system using AWS S3, Lambda, and API Gateway to automate customer intake and backend processing, replacing manual request handling with automated, real-time data flows.

Halo Studios Collaboration (formerly 343 Industries)

November 2023 – March 2025

- Collaborated with Halo Studios to design and ship a custom multiplayer game mode, maps, and curated playlist for Halo Infinite, applying systems thinking and iterative design to a live production pipeline.
- Built gameplay logic using in-engine, block-based scripting tools, translating design concepts into functional systems.
- Partnered with QA and Playlist teams to test, debug, and refine gameplay behavior prior to live releases.

Post-Admit Checklist Modernization

2025

- Replaced static, manual post-admit tracking with a dynamic, condition-based checklist in Element451, tied to application and decision data so admitted students only saw requirements that actually applied to them.
- Coordinated checklist logic, custom fields, and SFTP/import processes across Admissions, Housing, Registrar, Financial Aid, Bursar, Advising, Health Center, and Academic Support.
- Early indicators from the rollout point to stronger admitted-student engagement, including an estimated 18% increase in orientation registration and 22% increase in housing applications.

EDUCATION

Georgia Institute of Technology | Atlanta, GA
Master of Science in Computer Science (OMSCS)

In Progress

University of Georgia | Athens, GA
Master of Business and Technology in Management Information Systems

May 2025

College of Coastal Georgia | Brunswick, GA
Bachelor of Business Administration in General Business

May 2023
